

ASHRAE's New Standard Helps Building Owners/Managers Minimize Risk

...and calls for building owners and managers to have a proactive, prevention program with licensed professionals who can manage and oversee performance and remediate immediately if needed.

LEGIONELLA & YOUR WATER SYSTEM

What's Your Plan for Minimizing Risk?

Call Tustin Water Management Solutions

- ▶ Avid proponents of ASHRAE Standard 188-2015 — Legionellosis: Risk Management of Building Water Systems
- ▶ Experts in water management
- ▶ Experienced in remediation
- ▶ Your partner in water system protection

ASHRAE 188-2015 Covers:

- Cooling Towers
- Air Washers | Humidifiers
- Misters | Atomizers
- Fountains
- Multiple housing units with centralized hot water
- Housing with occupants 65 years and older
- Facilities with patients staying longer than 24 hours
- Health care facilities that treat people with specific health risks

Focused, routine maintenance and remediation is the only way to prevent the amplification of legionella.
